Dec. 1952 12-A-52

COMMENTS BY THE MARK P. CONTROLS
re Interview with Disc-Man

THE YADA DI SHI'ITE: "New conditions are developing. You are verging upon a contact with these other beings. Certain persons in high official places have had this information already----in Scotland, Australia, and the Andes. These have received definite contact, not through a medium or any psychic means, but in ordinary conversation, just as we converse sitting here. The Etherians, to use your word, were present in natural earth bodies.

"To turn first to our friend, Mr. Adamski -- it is a Polish name with accent on the first syllable. This man, while somewhat excitable, is honest and sincere. These people from other times have been among Earth people for many years, going and coming as you do, but unknown to you as different from yourselves. All your present knowledge has been passed back to youfrom far distant times, and civilizations on other planets where man as man lived long ago. Man himself is a space being, but he became caught on this Earth and lost all his knowledge on being able to get off the Earth, and to speed through space from one celestial body to another. In a great cataclysm, all of his knowledge was destroyed and he was shipwrecked, so to speak, on this island called Earth. These beings which you call the Pekin Man, the Cro-Magnon man, etc.-- these were the end products of a civilization which was indeed mighty upon this Earth.

"Venus was once habitable (No, Venus was never a comet). It bore a great civilization at first, but a shifting of bodies began in the solar system, and this brought Venus nearer to the Sun, and as the distance decreased, the surface temperature became too much to support life. But the scientific minds among these ancient Venusians knew this was to come about, and so created vast under-ground tunnels, where the civilization of Venus, which survived, went under-ground. Due to the intense heat, a great amount of poisonous air, what you call carbon dioxide, was produced, so that surface living became impossible. The Venusians then removed in time from the planet in search of better conditions elsewhere in the solar system. They tried both Mars and the Moon. At that time the Moon was very habitable, but then came other trouble, when the Earth moved out of its orbit, and away from the Sun. Another body smaller than the Moon made its appearance, so that the Earth had two Moons. A kind of ice-age followed for the Earth (this was before the formation of the ice shell in the upper atmosphere). In the ice-age all life was suspended (not extinguished). Then the Earth started moving back into its original orbit, and in doing so, pushed the small Moon toward the larger one. A collision resulted, and the smaller Moon was destroyed. The fragments of this fell upon the other Moon and produced many of the crater-like pits now visible on its surface. It was, in effect, a rain of asteroids. The Moon, by the way, floats along with a directional movement in space, but it does not rotate. When the Earth returned to its orbit, all life on the Earth was destroyed, but many of the Moon people had already landed on Earth.

"Concerning the "Marked Marzons", or Martians, it is true that they are distinguished by a cross within the eye, but then, nearly all persons bear similar marks in the aura or on the palms of their hands, or other parts of the body, and these indicate that the person concerned came from Venus, Mars, or the Moon, as the case may be. The practice of palmistry originated in connection with this knowledge of planetary marks in the palm).

"The story of Time was originally measured by planetary distances, and by the aspects of the great Swastika of the heavens, called The Great Bear.

"Concerning now the foot-prints left on hard, rocky ground by the occupant of the landed Saucer -- where the steps of Mr. Adamski left no trace at all. Your conjecture is correct that this visitor, in spite of his normal human-like size, had really a body of immense weight. This is because his body was essentially of Etheric matter, which, as you know, is extremely dense. Yet I must say that the impression on the hard,

rocky ground was made through pressure rather than by weight in the usual sense -- somewhat as the mark of your pencil is not made by the weight of the pencil. As to the importance which this person seemed to attach to his footprints with their symbolic designs, I should say that this was only one more gesture in the slow process of the education of Earth people.

"As to Mr. G. A., it is my belief that his mind has a somewhat too mystical turn , so that while he is playing his part to very good effect, the particular interpretations placed by him on the symbols are of no particular value except to himself.

"Concerning this matter of landings, I repeat that they have been frequently made and contacts established with Earth people, but for the most part, the information and advice given to you has been laughed off. What the space people have been trying to do is to save the solar system from the after effects of atomic explosions combined with other factors. Some of you people in authority have been told what would happen if the hydrogen bomb were used repeatedly. This, too, was treated lightly by people whom you think to be possessed of brains -- but if so, they are unable to use them.

"I must go now -- my colleague, Natalli, will soon come and talk to you."

CONTROL RAMOND NATALLI: "When this space craft is in flight it is operating on magnetic fields, not only of the Earth, but of other bodies in space, also. The Sun in your system is like a dynamo; it is a creator of magnetic energy, both positive and negative in nature. But in itself, the immediate flow is negative, and does not become positive unless it is working on other bodies. It makes its points of contact with your Earth and other bodies through the magnetic pores. The Earth itself, and any other body, have but little magnetism, but when the flow from the Sun contacts the pores of these bodies, then this is very strong, becoming positive and negative so that it has a push-and-pull nature, working on alternating currents. The history of electricity shows that until the idea of alternating currents was understood, electric motors were nearly impossible. All the island universes work on this principle. Gravity is electronic in nature. The vast dark spots in the heavens, some of which your astronomers know about, hide many things from your observation. These dark spots are produced by substance which is enormously dense; one cubic inch of it would literally weigh billions of tons. The growling noises often heard in space, arise from these clouds, which are, in effect, vast electrical fields. They are more frequent of late, simply because more action is now going on. Little can be said about the causes, except that it is part of the cosmic processes. The atoms are mating -- if I may use so unscientific a term. Electrons and atoms are building new creations, new bodies. Such action begins in vortexes, and the noises act as vibrations in the ethers --like great sound waves that drive the particles of cosmic matter into new formations. Sound waves make vortexes in the sub-atomic ethers, that is to say, they create stresses. In these electronic flows there is a movement in wave patterns. You have what may be called wave quanta, for the waves are made up of particles expressing themselves as quanta. The point generates the line, the line generates the surface, and the surface a solid. Now, with proper instruments you can cross the wave lines at the high point of the wave. All waves are moving in curved lines. When you do this, you can move a ship or any object in space at the speed of light, or at any other speed desired, greater or less. This cannot be done as long as you are trying to move a solid in a field of solid substance -- that is, in the atmosphere, because it creates friction, which produces heat.

"Motion as you think of it on your plane, is really a device for the measurement of time. If motion creates friction on a solid, in time it is going to melt it, and hence convert it into kinetic energy. But in crossing the magnetic forces you will creat a vacuum or near-vacuum in which matter has suffered loss of energy, and hence a deep inertia. The deeper the vacuum, the greater the inertia. Only under these conditions in the vacuum can you move a structure of your world at any great speed without its

disintegrating into kinetic energy or light.

"Again, in tuning on to wave lengths (as in radar, radio, etc.) you are marking degrees along the magnetic lines --in other words, you are tuning into the proper band. Now, you can tune out and you can tune back again, and on this principle you can make a thing appear and disappear.

"These beings from other states of existence (you can call them planets if you wish) -- they live and operate in other time systems. In their "flight" they cross what you call entire systems or galaxies. This flight does not "take time", as you understand the words. It is not in time at all. Or perhaps you prefer to say that it is in sub-atomic time. You cannot think this fact. I cannot explain it to you. Between the time frames of the sub-atomic worlds (which are endless in their numbers) and time frame of the world of your sense perception, there is truly nothing in common. An instant in your world may equate with thousands or millions of years in some sub-atomic time scheme -- or, the other way around. You have asked me 'just what would an Etherian do if he wished to appear in your world' -- if he wanted to "cross space from Arcturus". I cannot tell you. I do not know of any concepts in your science or philosophy by which such an operation can be explained to you. And although I am anxious to avoid falling into metaphysics, I do not see how it can be avoided. So perhaps I shall have to remind you, after all, that space and time alike are mental concepts in their nature -- and that the whole universe is also one great mind, so that all things in it and all emotions are likewise mental in nature--- or awareness or consciousness.

"May the blessing of your God and of my God be with you."

- NATALLI -

--- --- ---

Note: In connection with "I do not know of any concepts" etc. (sup.) Natalli took occasion to refer to Professor Einstein. "There is probably only one man on earth today who has some understanding of what subatomic time may mean, and he grasps it intuitively and uncertainly - and that is Einstein. And he can express these intuitions only by symbols - mathematical symbols. How many people in your world can understand these symbols? Very few indeed, perhaps none. " This was Natalli's way of saying, 'if Einstein cannot make his concepts intelligible to you, how do you expect me to make clear the matter of time-schemes in the subatomic worlds of the ethers. If I myself could grasp them, if I could set them down in symbols (and there would be no other way), would those symbols mean anything to you?.....

In another verbal detour of this conversation Natalli said: "Ha! So now I am to become a Pip! Let me see how many things people have accused me of being. A fake, a fraud, a part of Mark's subconscious, an astral shell, a kind of synthetic spook made up of the minds of all of you, an evil spirit, an Elemental, an old incarnation of the medium - and now you are going to turn me into a Pip!"... The Control was referring here to a proposed experiment with the radar screen, with which he hopes to be successful. The Yada also feels optimistic about this - "provided I lower my own vibratory rates sufficiently." Experiments in a haunted house in England are said to have shown results of this kind. We do not have dibs on this idea, but second-dibs anyhow, and Round Robin will give you the results. Since a low-grade 'hant' is supposedly functioning on the low-etheric levels, the importance of this experiment needs no explanation.

You may not believe in the infinite and eternal ethers or in the races and cultures which inhabit them - but be sure of one thing at least: this house of cards and rubble we call 20th century civilization is giving way at a hundred joints. "You cannot build a fine new house out of rotted timbers" says the Yada di Shi'ite.

HEADQUARTERS CLOSE-UP
or
Notes for our Associates

We are enclosing with this RR a summary of an actual encounter with a 'space-man' or 'Etherian', together with certain comments by the well-known trance Controls of Mark Probert, the Yada di Shi'ite and Ramond Natalli. There is every reason to believe that this incident is genuine, hence extremely important, and it makes the kind of news you will not get anywhere else. But before you make up your mind on this point, we recommend that you read the whole circumstantial account. It was too late for Round Robin, so we are going to put it out as a brochure - small, but 'don't judge a pill by its size'.

This business of the aeroforms (Discs, Saucers, Ether-Ships) is deadly serious. There is some kind of planetary crisis impending. Most of our Associates really want to know all the available facts, and are receptive and capable of understanding what is going on - far more than can be said of the average earthling. No other group anywhere, so far as we know, is trying to disseminate this vital information.

BUT we are going to have to ask our Associates to pay for this brochure. We send out a good deal of free material to our members - but BSR is literally a non-profit, public service set-up and has no reserve or endowment. Many members have been very generous and helpful, but still we are constantly hampered by the expenses we have - and the money we haven't (!)

Yes, we know there are other people in a similar fix.

If you want this forthcoming Release, let us know and we'll send it. But will you send us in return (or when you order, as you prefer) whatever you can spare and want to spare for the Aid-'n-comfort of Round Robin? Anything from $1.00, up, or down - there's no top limit!!

- - - - - - -

Now a few homely facts about your-and-our BSR set-up. We have two rather large office rooms at the Hdqrs. address - with long tables, and shelves, and files files files, papers papers papers, books books books. We have one hand-mimeograph machine, three typewriters, and one addressograph of doubtful dependability. We mimeo the short stuff ourselves but have to send the rest of it out - RR, and all of the booklets and Transcripts and long releases (and does that cost us money!!). Our present office force consists of Mrs Margaret Locke, Miss Kathleen Banks (S.D. State College student), and yours truly the Director. These two helpers work part time only, tho we could easily find work for 4 or 5 full time helpers IF we could afford them. There's always a heavy accumulation of unpublished material, the kind that ought to be published - and mail which needs prompt attention piles up for 2-3 weeks before we can get to it.

There is, almost literally, no limit to the urgent and significant information that comes in to us, but which we have to exclude from RR and can barely touch in releases and transcripts.

The Mark Probert mediumship alone would (and should) have the full-time attention of at least one competent person. This is the best or near-best deep trance mediumship offered publicly anywhere in the world, has been studied and reported by us for six years past, and is an inexhaustible mine of scientific, philosophical and occult information.

We don't get this stuff to you because because we can't afford it.

We probably reach 2000-2500 people, though our paid-up subscription list is only about half of that (our publications are passed around a great deal). Our first issue, 8 volumes back , was exactly 25 copies. We have been urged to increase our

membership rates (to $10.00) and to raise the prices of our publications. (But we have so many fine personal friends who make sacrifices to pay for them even at present rates!).

If you have every put out a mimeo publication (or any other kind), you know where the money goes. Or figure, say, 1000 copies of RR at 25 pages each (50 reams of paper), the stencil cutting, mimeographing, collating all those pages, binding, addressing and stamping the envelopes, increased costs of everything, office time by the hour, handling and mailing. Add in the various booklets, releases and transcripts, and the correspondence, bookkeeping, file-keeping - and among bills payable add $50. office rent each month ... (Then add apologise for this itemizing and you have a kind of close-up of our BSR job.

What's the point of all this - if you have read this far? Partly that we want you to know we could give you far better service, more important material if we had $2.00 for every $1.00 that comes in. Also, that all receipts go back into the BSR work (your Director does not make his living out of the BSR). And that if 3-4-500 people could spare a dollar a month more, or $5.00 a year more, we could stop worrying about the rent long enough to build up our news releases.

Those of you who are especially interested may have some ideas about this situation. I wonder how many of you would pay $10.00 a year instead of $5.00. I can't bring myself to increse the rates that much, account of so many good friends who would simply have to drop out. Or how many of you would make it $10.00 instead of $5.00 provided we could get (say) 200 or even 100 altogether to do the same. We could send out a list of such helpers for your information.

No, we're not completely discouraged - but we are going to slip a copy of this letter into Santa Claus mail as if by mistake. Maybe the old boy will leave us some bird seed for Christmas.

Tuitissimus to all of you --- ML.

A few lines more about the Adamski "Interview": We call attention to the fact that seven reputable people were involved in this; that all of them saw the "mother ship"; that those not near by at the landing of the Disc saw the Disc-man from a distance through binoculars; that they saw him approach Mr. Adamski; that all saw saw the footprints soon afterward and made casts of them; that the phenomenon of these prints on hard rocky ground is vouched for by all; that none of these seven people has anything to gain, and two or three of them have much to lose by lending themselves to any kind of fraud.

The forthcoming Release we have just promised you consists mainly of a detailed account of the whole affair. A systematic effort is under way to break down our ignorance and complacency, and this is another step in the process. We hope all of our Associates will give close critical attention to every aspect of the matter - and not be misled by purported exposes' or any amount of ridicule. It has taken six years, but the pieces of the puzzle are beginning to fall into place.

In our promised Release we shall print a statement and an interpretation of the symbols as given by the Yada di Shi'ite. We may also be able to include a statement and interpretation by DR. KAPPA, a distinguished occult scholar who himself once had an unhappy encounter with the Etheric people.

Let us all remember, that we are about as competent to generalize about the etheric worlds and peoples, as a five-year-old would be to discuss the cultural status of America. We try to put two and two together - but there are worlds in which they do NOT make four. That, I think, is the first thing we have to learn - and it is high time we set about it. This learning, however, seems likely to demand not only strong desire and patience, but a good deal of courage as well.

COMMENTS BY THE YADA DI SHI'ITE ON THE SPACE-MAN INTERVIEW:

(The Yada begins by saying that he and his associates have read the published account, studied the drawing of the foot prints and the plaster casts themselves, have visited the homes of all persons concerned and listened to their thoughts and conversations, and finally examined the desert site of the incident. He will now give us his findings in brief):

"The story is in the main true. The Disc did land and Mr. Adamski did carry on a conversation with the operator of said ship. But brother Adamski was so exicted he does not remember clearly all that was said. This particular ship was from the planet Venus. We would like to remind you, however, that the intense heat on that body, due to its proximity to the sun and an atmosphere heavy with carbon dioxide, make it highly unlikely or impossible that beings with the same organic structure as earth-man could abide on its surface. These Venus beings live in the ether of this planet.

"The markings on the plaster casts of the shoes are a symbolic language. In the center of the "A" shoe (right foot) are two lines crossing one another and converging on the oval design which is a Disc. This represents the fact that if, and only when the magnetic forces of the earth are CROSSED can they be made of sufficient power to be used as a driving force. The earth itself generates only a negligible amount of magnetism. But when these lines are crossed they become aligned with two other planets, Mars and Venus - which is what the two small circles on the left and right side of the crossed lines represent; the one below being the Earth. Venus, Mars, and the Earth drawing their magnetic currents from the Sun.

"On the heel of the same shoe is the ancient Swastika, indicating that those of most ancient times knew that magnetic forces of the Sun, Venus, Mars,and Earth moved from west to east between these four bodies. The circle at the far tip of the shoe with a line running through its center is the Sun. The curved lines on either side of both shoes depict the fact that when the magnetic lines of force are crossed they will create a path in which gravity is completely null and void. As all free forces travel in a curved line, it is quite simple to understand how by converging these lines upon one another their separate strength would be amplified; and at the same time an almost complete vacuum would be created in the orbit of motion they once held. All forces are really but one force, and that is electronic. Apparent differences arise from the nature of the work the force is committed to. Gravity,for instance, originates from vast fields of invisible matter, a cubic inch of which weighs billions of tons, and somewhere along its curved band it will turn into light, for its parts are principally made up of free electrons seeking to unite with an atom that has lost one of its satellite bodies or electrons. Gravity is "negative magnetism" until its flow comes in contact with the earth and other bodies in space, when it sets up a positiveCnegative, push-pull action between the poles of all such bodies. Was gravity not electronic in nature, that which you have today called radio, television, radar and the like, would be quite impossible, for all these do their work in different degrees of what may be called the "maga-gravity" band of the solar system,(magnetic-gravity). "

The foregoing transcribed by Mark Probert, clairaudient reception, Dec.1,1952.

The Yada di Shi'ite (Chief of the Shi'ite clans) is one of the best known among the famous Inner Circle Controls, for the deep-trance mediumship of Mark Probert. This mediumship has been under careful study for the last six years, by members of the BSR, and thousands of pages of such communications have been published. BSR Hdqrs are at 3524 Adams Ave., San Diego 16, Calif. (Meade Layne. A.M., Director).
